

Protocol instructions

This document is a list of all the different types of rapports and protocols which the Swedish authorities created when the Danish Jews fled in October 1943. There are five primary types of protocols:

1. Uppgift
2. P.M.
3. Ansökan om visering
4. Främlingspass
5. Ukendt

On the next page you will see the titles of the particular protocols together with an explanation of their origin, information and limitations. They have been divided in two groups depending of their amount.

The ideal protocol is **Uppgift** since it contains name, date of birth, place of birth, nationality, religion, title, residence, education, marital status, children, cause of refuge, time of flight, place of flight, time of arrival, place of arrival, money on arrival and time of the protocol's creation.

All the other types of protocols contain less information than **Uppgift** and their limitations are described in their respective sections on the next page.

Frequent types of protocols:

Ansökan om visering:

Visa application from the Kungl. Socialstyrelsen, Utlänningsbyrån in Stockholm. Filled out and sent after having been issued an emergency visa and after having been through interrogation.

Does **not** contain residence, time of flight, place of flight and place of arrival.

Främlingspass:

Filled out by refugees that did not have passport or other means of identification at arrival.

Does **not** contain religion, time of flight and place of flight.

Landsfiskalrapport:

Protocol created by Landsfiskalen (rural police) of the refugees.

Does **not** contain residence, time of flight and place of flight.

P.M.:

Interrogation protocol created and used by the police in Helsingborg.

Does **not** contain time of flight and place of flight. Regarding religion, this protocol uses the Nazi racial definition of a Jew in the box *Jude*. The secretary has written *yes* or *no* and sometimes added the actual religious affiliation for example *belongs to the Mosaic faith* or *protestant*.

Ukendt:

Protocol without a clear official authority or state office but only a serial number. Michael Mogensen's theory suggest that it could be the navy's protocols, but that does not correspond with the information we see in the documents. They have a Swedish address and the date stamps are often a long time after October 1943. Therefore, it is possible that these protocols were created by the Danish refugee office.

Does **not** contain time of flight, place of flight and time of the protocol's creation.

Uppgift:

Interrogation protocol created when the Danish Jews fled to Sweden.

Contain all information.

Infrequent/rare types of protocols:
